

Assessment Service Price List

1. General Cognitive Assessment

- This assessment procedure measures **general cognitive function** – the ability to think clearly and remember information
- Understand current strengths and weaknesses in cognition and daily functioning
- **Suitable for:**
 - Monitoring or **benchmarking** cognitive health (for hereditary / future disease)
 - Monitoring **disease** progression (e.g., in existing mild cognitive impairment or dementia)
 - Assessing **capacity** in relation to Decision Making or Testamentary or Power of Attorney procedures
 - Benchmarking pre-chemotherapy cognition for post-chemotherapy evaluation of possible chemo-related decline in one or more cognitive areas
- The assessment session, scoring and interpretation, and results summary are included in the assessment fee, *from* €350 (dependent upon complexity)

2. Cognitive Assessment - Comprehensive

- To evaluate change in thinking and/or memory and understand specific areas of cognition and functioning that are impaired
- The assessment session, scoring and interpretation, and report are included in the cognitive assessment fee, ranging from €1200 to €1,950 (depending upon complexity)

3. Cognitive Assessment – Comprehensive – Traumatic / Acquired Brain Injury

- To identify and evaluate the specific areas of cognition and functioning that are impaired post trauma to the brain (e.g., after accident, stroke, etc.)
- The assessment session, scoring and interpretation, and summary report are included in the cognitive assessment fee, ranging from €1200 to €1,950 (depending upon complexity)

***Note.** if a home-visit assessment is required or desired, an *additional* travel expense is charged based on mileage from Kilkenny city (capped at €100)
